INTRODUCTION

This artistic-cartographic competition was created in the year 1993 by the International Cartographic Association (ICA) as a memorial for Barbara Petchenik, cartographer and ex vice-president of the ICA, who worked all her life with maps made by children.

The competition takes place every two years, coinciding with the ICC conferences of the ICA.

The objective of this event for children is to promote the creative and geocartographic portrayal of the world as seen by kids, thus raising their cartographic perceptivity and their awareness of and respect for the environment.

The six winning pieces from each country and the six overall winners at the international level, will be displayed during the corresponding International Cartographic Conference (ICC).

The Children's Maps Competition for 2009 coincides with the 24th ICC (ICC-2009), to be held in Santiago, Chile between the 15th and the 21st of November.

General Rules of the Competition

• ICA member nations will collect maps, on the theme “Living in a globalized world” for 2009, produced by children under 16 years of age. This is the theme for the **Barbara Petchenik Children’s World Map Competition** for the next two conferences (2009 and 2011). Entries from other nations, who are not members of the ICA, cannot be accepted, will not be displayed or returned.

- The entries will be collected in three age groups:
 - under 9 years
 - 9-12 years
 - above 12 years

- The international judging will focus on three criteria: 1) a recognizable message, 2) cartographic content, and 3) the quality of execution.

In other words, judges will be looking for:

1. a recognizable connection between the form, shape, and use of cartographic elements which creatively address the Competition’s theme.
2. a recognizable image of all or a large portion of the world in which the shapes and relative locations of land masses and oceans are as correct as can reasonably be expected for the child’s age and within the context of the “system of projection” used.
3. appropriate cartographic elements such as symbols, colors, names and labels, etc., which help address the Competition’s theme:
 - clarity and legibility of the point, line and area symbols appropriate to the media of expression, whether on paper or other surfaces, whether drawn or made up of indigenous materials.
 - expressive rendering and appropriate use of the perceptual dimensions of color, i.e., changes in value for quantitative distinctions and changes in hue for qualitative distinctions.
 - overall aesthetic quality in such matters as balance and harmony among the image elements.

The maximum size of a map must not exceed A3 (420 mm x 297 mm or 17 x 11 inches) and its surface should be flat; the map can be made using any material, but pasted-on objects may not be higher than 5 mm or 0.2 inch.

- Any number of “systems of projection” can be used to generate the coastlines and other base material (e.g., international boundaries and graticule). The entry should be an original piece of work and it can be made using traditional methods (colour pencils, water colour, etc) or a computer program.
- Each map must have the following information on a label attached to the back side of the representation: the name, age, school or personal address and country of its author, photo of the child (if available) and the title in either French or English (the ICA’s official languages). If the entry is individual (not sent by a school) the author’s legal representatives (e.g. parents) will decide to make or not public their personal address. If the representatives do not agree to make it public, the official address of the ICA National Commission will be used for future contacts.
- The winning entries will be submitted to international organizations (UNICEF International Art Committee or others) by the ICA Executive for consideration as greeting card designs or other kind of publication that might best showcase the maps created for the Competition. ICA may use them as well. Any participant must agree that his/her representation may be reproduced by the ICA or UNICEF or scanned for publication on the Internet by Carleton University (on behalf of the ICA) without consultation or copyright fees.
- Competition maps will be archived in the Archives and Research Collections at Carleton University Library and will be available for public viewing on the Library’s website (see <http://children.library.carleton.ca>).
