A new competition on Educational Cartography

- It was sent to EC representatives (President and Secretary- General), to be discussed during the meeting in Santiago de Chile. If it is approved, this competition will be organized every two years beginning from ICC 2009 in Santiago de Chile. ???
- *The competition on Educational Cartography was approved by EC last November, but the call will be send by David Fairbairn to ICA national representatives (after sending the call our Commission will place officially the call to our website and ICA website will link it).*

2007-2009

Proposal to EC for an educational cartography competition

Sent by our Past Chair, Patrick Wiegand in 2007, July

The whole proposal can be downloaded in our website

-Submissions are invited for the competition in the form of maps, atlases and other educational cartographic products designed to be used for school students within the 3-18 age range. The term 'educational cartography' should be interpreted broadly to include, for example, conventional and digital materials, maps, globes and GIS. It shall not be restricted to published materials (enabling, for example, materials produced by cartography students and teachers to be included). *Materials that are primarily instructional in nature (i.e. textbooks on map skills) are not, however, included.*

-Items will be selected from those submitted for the map exhibition. Items submitted for the map exhibition will be deemed to be submitted to the educational cartography competition if they meet the criteria for inclusion. *Items may also be submitted directly for consideration by the judges. They must be accompanied by the same information as for items for the map exhibition.*

- Up to three awards will be made (gold, silver and bronze). There is no financial prize but authors and publishers will be able to use the following statement in their promotional materials: '(Gold) award winner of the International Cartographic Association competition for excellence in educational cartography, *date*'.

Commission meetings

- Previous events: The Commission had two meetings: a first one during the ICC 2007 in Moscow and the second one during the 2nd International Conference on Cartography and GIS (Borovets, Bulgaria), in January 2008.
- The Commission planned a next meeting and conference in Madrid in April 2009, but because of financial difficulties presented by the Organizing Institution the meeting was changed to Prague in January 2009, within the Joint Symposium on Cartography and Geoinformatics for Early Warning and Emergency Management organized by the Working Group on Early Warning and Emergency Management.
