1990 - 1993: Research scholar at Department of Surveying and Mapping, NTNU.  
1988 - 1993: Scientific assistant at the same department.

## KEY QUALIFICATIONS

Terje Midtbø has been working with education and research within Geographical Information Science and Cartography. In his work he has interests within data structures for terrain modelling, methods for distribution of geographic information on the Internet and handling of geographic phenomena which includes a temporal component. The last years he has, for one thing, studied map animations and how these can improve the communication of map information. He is leader of the board of the Norwegian Association for Geomatics and Geographic Information Science (GeoForum). He is also leader of the board of GeoForum (Norwegian association for people who have professional interests in spatial information)
