To add a TIN theme to a view

1 Activate the view you want to add the TIN theme to.

2 Press the Add Theme button . This will bring up the Add Theme dialog.

3 Change the Data Source Type dropdown list to TIN Data Source in the Add Theme dialog.

4 Navigate to the directory that contains the TIN data source you want to add as a theme.

5 Select the TIN data source and press the OK button in the Add Theme dialog. The TIN data source will be added to the active view as a TIN theme with a default legend.
