

Rules on the Use of AI in the Preparation of Theses

in the Spring Semester of the Academic Year 2025/26
for Students Preparing Their Theses and Supervisors

(Transitional Provisions for the Implementation of Dean's Instruction No. 1/2026 (III.26.))

The provisions of Dean's Instruction No. 1/2026 (III.26.) entitled "*The Use of Artificial Intelligence in Education, Research and Administration*" shall be applied to students submitting their theses in the second semester of the 2025/26 academic year as follows:

For every submitted BSc and MSc thesis, a signed document entitled "*Declaration on the Use of AI Tools*" (hereinafter: "Declaration") must be attached as a separate file within the submitted .zip archive.

If the supervisor has prohibited the use of AI tools at the start of the work, or has made their use subject to specific conditions, the student is required to comply with these provisions and document this in the Declaration.

If the supervisor has not prohibited the use of AI tools nor prescribed any specific conditions for their use, then for theses submitted in the second semester of the 2025/26 academic year, the use of AI tools is permitted subject to the following conditions:

- The use must be detailed in the Declaration.
- Output generated by AI tools (including code or text) may not be submitted as the student's own work and may not be used without verification. The student bears full responsibility for the content of the thesis.

The supervisor shall check the thesis using the Turnitin system and verify the formal and substantive compliance of the submitted Declaration. If the Declaration is not attached, or if it is submitted with content that contradicts the supervisor's instructions or contains false statements, the evaluation of the thesis shall be refused, and the student shall not be allowed to take the final examination. Submitting a Declaration containing false statements shall result in disciplinary proceedings. In case of suspicion, the supervisor may verify, either orally or in writing, that the work is indeed the student's own intellectual product, and may involve their departmental or institutional superior, as well as the Disciplinary Committee, if necessary.

The supervisor shall inform the supervised students in writing about these conditions by 15 April 2026.

Dr. Tamás Kozsik
dean for Faculty of Informatics
